GROWTH CODES

AI FOR TEACHERS

THE PRACTICAL PROMPT PLAYBOOK

100 Ready-to-Use AI Prompts for Lesson Planning, Classroom Management, Assessment, Student Support & Daily Teaching Productivity

FOUNDER'S NOTE

AI is changing the way teachers plan, teach, assess, and support students.

This playbook was created to help teaching professionals save time, reduce repetitive work, and use AI confidently in their daily classroom tasks.

Every prompt inside is practical, professional, and ready to use — designed to support lesson planning, student engagement, assessment, feedback, communication, and productivity.

AI will not replace great teachers. It will empower teachers to work smarter and create better learning experiences.

With best wishes,
M.shammas

Table of Contents

Introduction 3

How to Use This Playbook 4

Section 1: Lesson Planning Prompts 5 -9

Section 2: Classroom Teaching Prompts 10-14

Section 3: Student Engagement Prompts 15-19

Section 4: Assessment and Quiz Prompts 20-25

Section 5: Feedback and Student Support Prompts 26-30

Section 6: Parent Communication Prompts 31-35

Section 7: Exam Preparation Prompts 36-40

Section 8: Content Creation for Teachers 41-45

Section 9: Classroom Management Prompts 46-50

Section 10: Teacher Productivity Prompts 51-55

Bonus Section: Best Practices for Teachers Using AI 56-57

Final Note 58

INTRODUCTION

Teaching is no longer limited to delivering lessons inside the classroom. Modern educators manage lesson plans, student engagement, assessments, feedback, parent communication, reports, classroom activities, and continuous improvement.

AI can help teachers reduce repetitive workload, improve teaching quality, personalize learning, create better resources, and save valuable time every day.

AI for Teachers: The Practical Prompt Playbook contains 100 professional AI prompts specially designed for teaching professionals. Each prompt is created for real day-to-day teaching needs and includes:

1. **Problem** – The real teaching challenge
2. **AI Prompt** – A ready-to-use prompt
3. **Solution Method** – How to use the AI output effectively

This playbook is practical, professional, and classroom-ready.

HOW TO USE THIS PLAYBOOK

To get the best results, replace the details inside brackets with your actual teaching requirement.

Examples:

- [Grade/Class]
- [Subject]
- [Topic]
- [Student Level]
- [Duration]
- [Learning Objective]

For example, instead of writing:

“Create a lesson plan for [Grade] on [Topic].”

Write:

“Create a lesson plan for Grade 8 students on photosynthesis.”

For better results, always give AI:

- Student age or class level
- Subject and topic
- Learning goal
- Duration
- Difficulty level
- Preferred teaching style

Section 1:

LESSON PLANNING PROMPTS

Plan better lessons in less time with structured prompts for daily, weekly, monthly, revision, and substitute teaching needs.

Prompt 1: Complete Lesson Plan Generator

Problem: Teachers spend a lot of time preparing structured lesson plans.

AI Prompt:

```
Create a detailed lesson plan for [Grade/Class] students on the topic "[Topic]" for a [Duration]-minute class. Include learning objectives, required materials, introduction, step-by-step teaching process, classroom activity, assessment method, homework, and teacher notes.
```

Solution Method

Use the output as your base lesson plan. Review the activity and assessment sections to match your classroom strength and available resources

Prompt 2: 5E Lesson Plan

Problem: Teachers need inquiry-based lesson plans that improve student participation.

AI Prompt:

```
Create a 5E lesson plan for [Grade/Class] students on "[Topic]". Structure it under Engage, Explore, Explain, Elaborate, and Evaluate. Include teacher actions, student actions, questions to ask, and expected learning outcomes.
```

Solution Method

Use this format for science, mathematics, and concept-heavy topics where students learn better through discovery.

Prompt 3: Beginner-Friendly Lesson Plan

Problem: Some students struggle when a topic is introduced too quickly.

AI Prompt:

```
Create a beginner-friendly lesson plan for [Grade/Class] students on "[Topic]". Explain the topic in simple language, include real-life examples, basic definitions, common mistakes, and a slow step-by-step teaching flow.
```

Solution Method

Use this when introducing a difficult topic for the first time or teaching mixed-ability learners.

Prompt 4: Advanced Lesson Plan

Problem: High-performing students need deeper learning opportunities.

AI Prompt:

```
Create an advanced lesson plan for [Grade/Class] students on "[Topic]". Include higher-order thinking questions, analytical tasks, debate points, case studies, project ideas, and extension activities.
```

Solution Method

Use the advanced sections for gifted students, enrichment classes, or competitive exam preparation.

Prompt 5: One-Page Lesson Plan

Problem: Teachers need quick, simple lesson plans for daily use.

AI Prompt:

```
Create a one-page lesson plan for [Grade/Class] on "[Topic]". Include objective, key vocabulary, 3 teaching steps, 1 activity, 1 assessment question, and homework.
```

Solution Method

Use this for daily teaching preparation when you need a clean and practical plan.

Prompt 6: Weekly Lesson Plan

Problem: Teachers need to organize lessons across the week.

AI Prompt:

```
Create a weekly lesson plan for [Subject] for [Grade/Class]. The topic for the week is "[Topic/Unit]". Divide the plan into 5 days with daily objectives, teaching activities, classwork, homework, and assessment methods.
```

Solution Method

Use this to maintain teaching consistency and track syllabus progress.

Prompt 7: Monthly Academic Plan

Problem: Teachers need long-term planning for syllabus completion.

AI Prompt:

```
Create a monthly academic plan for [Subject] for [Grade/Class].
Include weekly topics, learning objectives, activities,
assessments, revision days, and project work.
```

Solution Method

Use this for academic calendars, department planning, or parent-teacher documentation.

Prompt 8: Substitute Teacher Lesson Plan

Problem: Classes need to continue smoothly when the main teacher is absent.

AI Prompt:

```
Create a substitute teacher lesson plan for [Grade/Class] on
"[Topic]". Make it easy to follow for a teacher who may not be a
subject expert. Include instructions, board work, student
activity, worksheet task, and classroom management tips.
```

Solution Method

Keep this ready for emergencies, leave days, or substitute teacher support.

Prompt 9: Lesson Plan With Real-Life Examples

Problem: Students often ask, "Where will we use this?"

AI Prompt:

```
Create a lesson plan for [Grade/Class] on "[Topic]" using real-
life examples, practical applications, storytelling, and simple
classroom demonstrations.
```

Solution Method

Use this to make abstract topics more relatable and easier to understand.

Prompt 10: Revision Lesson Plan

Problem: Students need structured revision before exams.

AI Prompt:

```
Create a revision lesson plan for [Grade/Class] on
“[Topic/Unit]”. Include key points, quick recap activities,
common exam questions, group revision tasks, memory techniques,
and a short quiz.
```

Solution Method

Use this before tests, board exams, unit exams, or final assessments.

Section 2:

CLASSROOM TEACHING PROMPTS

Make complex topics easier to explain with prompts for simple explanations, stories, analogies, board teaching, and interactive questioning.

Prompt 11: Simple Explanation Generator

Problem: Teachers need simple explanations for difficult concepts.

AI Prompt:

```
Explain "[Topic]" to [Grade/Class] students in very simple
language. Use examples, analogies, and step-by-step explanation.
Avoid complex words.
```

Solution Method

Use the explanation as a teaching script or simplify it further based on student level.

Prompt 12: Concept Explanation With Analogy

Problem: Students understand better when concepts are connected to familiar things.

AI Prompt:

```
Explain "[Topic]" using 3 easy analogies suitable for
[Grade/Class] students. Make each analogy clear, accurate, and
classroom-friendly.
```

Solution Method

Choose the best analogy and use it during your explanation or board teaching.

Prompt 13: Story-Based Teaching

Problem: Students may lose interest in direct explanation.

AI Prompt:

```
Teach the topic "[Topic]" through a short story suitable for
[Grade/Class] students. The story should introduce the concept
naturally and end with a clear learning point.
```

Solution Method

Use this for younger students or for opening a lesson creatively.

Prompt 14: Board Explanation Script

Problem: Teachers need a clear flow for explaining on the board.

AI Prompt:

```
Create a board explanation script for teaching "[Topic]" to
[Grade/Class]. Include what to write on the board, what to say
while writing, diagrams if needed, and questions to ask students.
```

Solution Method

Use this as a classroom delivery guide.

Prompt 15: Question-Based Teaching

Problem: Students learn better when they think actively.

AI Prompt:

```
Create a question-based teaching flow for "[Topic]" for
[Grade/Class]. Include opening questions, guiding questions,
thinking questions, and closing questions.
```

Solution Method

Use these questions to make the class more interactive.

Prompt 16: Misconception Finder

Problem: Students often misunderstand key concepts.

AI Prompt:

```
List common misconceptions students may have about "[Topic]". For
each misconception, explain why it happens and how a teacher can
correct it with a simple example.
```

Solution Method

Use this before teaching the topic so you can prevent confusion early.

Prompt 17: Difficult Topic Simplifier

Problem: Some topics feel too complex for students..

AI Prompt:

```
Break down the topic "[Topic]" into small, easy-to-understand
parts for [Grade/Class] students. Explain each part clearly and
include examples.
```

Solution Method

Use this to create a step-by-step explanation or classroom notes.

Prompt 18: Interactive Class Discussion

Problem: Teachers need discussion ideas that involve students.

AI Prompt:

```
Create an interactive classroom discussion plan for [Grade/Class]
on "[Topic]". Include discussion questions, student response
ideas, group tasks, and teacher follow-up questions.
```

Solution Method

Use this for social science, literature, ethics, science, and current-topic discussions.

Prompt 19: Quick Class Starter

Problem: Teachers need strong opening activities.

AI Prompt:

```
Create 5 quick class starter activities for [Grade/Class] on
"[Topic]". Each activity should take less than 5 minutes and
activate student curiosity.
```

Solution Method

Use one starter at the beginning of class to increase attention.

Prompt 20: Exit Ticket Questions

Problem: Teachers need to check learning before students leave class.

AI Prompt:

```
Create 10 exit ticket questions for [Grade/Class] students after a lesson on "[Topic]". Include easy, medium, and thinking-level questions.
```

Solution Method

Use 2–3 questions at the end of class to check understanding.

Section 3:

STUDENT ENGAGEMENT PROMPTS

Create active, fun, and meaningful classroom experiences through games, group tasks, debates, projects, and creative assignments.

Prompt 21: Fun Classroom Activity

Problem: Students may lose interest during regular teaching.

AI Prompt:

```
Create a fun classroom activity for [Grade/Class] students on
"[Topic]". The activity should be simple, low-cost, engaging, and
connected to the learning objective.
```

Solution Method

Use the activity during the middle of the class to improve energy and attention.

Prompt 22: Group Activity

Problem: Teachers need collaborative learning activities.

AI Prompt:

```
Create a group activity for [Grade/Class] students on "[Topic]".
Include group size, instructions, time limit, teacher role,
expected output, and assessment criteria.
```

Solution Method

Use this to develop teamwork and peer learning.

Prompt 23: Role Play Activity

Problem: Students learn better through active participation.

AI Prompt:

```
Create a role play activity for [Grade/Class] students on
"[Topic]". Include characters, situation, student instructions,
learning outcome, and reflection questions.
```

Solution Method

Use this for language, social science, history, business studies, and life skills.

Prompt 24: Debate Topic Generator

Problem: Teachers need meaningful debate topics.

AI Prompt:

```
Generate 10 debate topics related to "[Subject/Topic]" for
[Grade/Class] students. Include both beginner-friendly and
advanced topics.
```

Solution Method

Use these topics to improve communication, reasoning, and critical thinking.

Prompt 25: Classroom Game

Problem: Students need active revision methods.

AI Prompt:

```
Create a classroom game to revise "[Topic]" for [Grade/Class]
students. Include rules, materials required, scoring method, and
teacher instructions.
```

Solution Method

Use this before tests or after completing a unit.

Prompt 26: Think-Pair-Share Activity

Problem: Some students hesitate to answer in front of the class.

AI Prompt:

```
Create a Think-Pair-Share activity for [Grade/Class] on
"[Topic]". Include the thinking question, pair discussion
instructions, sharing method, and teacher follow-up.
```

Solution Method

Use this to encourage shy students to participate safely.

Prompt 27: Project-Based Learning Idea

Problem: Students need practical learning experiences.

AI Prompt:

```
Create a project-based learning activity for [Grade/Class]
students on "[Topic]". Include project objective, steps,
materials, timeline, final output, and evaluation rubric.
```

Solution Method

Use this for long-term assignments and experiential learning.

Prompt 28: Creative Assignment

Problem: Regular homework may feel boring.

AI Prompt:

```
Create 5 creative assignment ideas for [Grade/Class] students on
"[Topic]". Make them interesting, meaningful, and easy to assess
```

Solution Method

Use these as alternatives to traditional written homework.

Prompt 29: Student Presentation Task

Problem: Students need confidence in speaking and presenting.

AI Prompt:

```
Create a student presentation task on "[Topic]" for
[Grade/Class]. Include presentation structure, time limit, key
points to cover, assessment rubric, and audience questions.
```

Solution Method

Use this to develop communication skills and subject understanding.

Prompt 30: Low-Resource Activity

Problem: Not every classroom has digital tools or special materials.

AI Prompt:

```
Create a low-resource classroom activity for teaching "[Topic]"
to [Grade/Class] students. Use only board, notebook, paper, and
student participation.
```

Solution Method

Use this when teaching in classrooms with limited resources.

Section 4:

ASSESSMENT AND QUIZ PROMPTS

Design quizzes, worksheets, tests, rubrics, answer keys, and exam-style questions quickly and professionally.

Prompt 31: Multiple Choice Questions

Problem: Teachers need quick objective questions.

AI Prompt:

```
Create 20 multiple-choice questions on "[Topic]" for
[Grade/Class]. Include 4 options for each question, correct
answer, and short explanation.
```

Solution Method

Use these for quizzes, practice tests, or online assessments.

Prompt 32: Short Answer Questions

Problem: Students need practice answering clearly.

AI Prompt:

```
Create 15 short answer questions on "[Topic]" for [Grade/Class].
Include model answers in simple language.
```

Solution Method

Use these for notebook work, oral tests, or exam preparation.

Prompt 33: Long Answer Questions

Problem: Students need structured writing practice.

AI Prompt:

```
Create 10 long answer questions on "[Topic]" for [Grade/Class].
Include answer outlines, key points, and marking guidance.
```

Solution Method

Use this for exam preparation and writing practice.

Prompt 34: Higher-Order Thinking Questions

Problem: Students need questions beyond memorization.

AI Prompt:

```
Create 10 higher-order thinking questions on "[Topic]" for
[Grade/Class]. Include questions based on analysis, evaluation,
creativity, and application.
```

Solution Method

Use these questions for advanced learners and classroom discussions.

Prompt 35: Quiz With Difficulty Levels

Problem: Mixed-ability classes need different question levels.

AI Prompt:

```
Create a quiz on "[Topic]" for [Grade/Class] with 5 easy, 5
medium, and 5 difficult questions. Include answers and
explanations.
```

Solution Method

Use this to assess different levels of understanding.

Prompt 36: Worksheet Generator

Problem: Teachers need printable worksheets.

AI Prompt:

```
Create a printable worksheet for [Grade/Class] on "[Topic]".
Include instructions, fill-in-the-blanks, true or false,
matching, short answers, and challenge questions.
```

Solution Method

Copy the output into a document and format it for printing.

Prompt 37: Answer Key Generator

Problem: Teachers need quick answer keys for correction.

AI Prompt:

```
Create an answer key for the following worksheet/questions:
[Paste Questions]. Provide correct answers and short explanations
where needed.
```

Solution Method

Use this to save correction time and maintain consistency.

Prompt 38: Rubric Generator

Problem: Teachers need fair evaluation criteria.

AI Prompt:

```
Create an assessment rubric for a
[Project/Presentation/Essay/Activity] on "[Topic]" for
[Grade/Class]. Include criteria, performance levels, marks, and
feedback suggestions.
```

Solution Method

Use this to assess different levels of understanding.

Prompt 36: Worksheet Generator

Problem: Teachers need printable worksheets.

AI Prompt:

```
Create a printable worksheet for [Grade/Class] on "[Topic]".
Include instructions, fill-in-the-blanks, true or false,
matching, short answers, and challenge questions.
```

Solution Method

Copy the output into a document and format it for printing.

Prompt 37: Answer Key Generator

Problem: Teachers need quick answer keys for correction.

AI Prompt:

```
Create an answer key for the following worksheet/questions:
[Paste Questions]. Provide correct answers and short explanations
where needed.
```

Solution Method

Use this to save correction time and maintain consistency.

Prompt 38: Rubric Generator

Problem: Teachers need fair evaluation criteria.

AI Prompt:

```
Create an assessment rubric for a
[Project/Presentation/Essay/Activity] on "[Topic]" for
[Grade/Class]. Include criteria, performance levels, marks, and
feedback suggestions.
```

Solution Method

Use the rubric to grade student work clearly and fairly.

Prompt 39: Diagnostic Test

Problem: Teachers need to understand students' prior knowledge.

AI Prompt:

```
Create a diagnostic test for [Grade/Class] students before
teaching "[Topic]". Include basic concept questions, prerequisite
knowledge questions, and skill-check questions.
```

Solution Method

Use this before starting a new chapter or unit.

Prompt 40: Remedial Test

Problem: Some students need extra support after poor performance.

AI Prompt:

```
Create a remedial test for [Grade/Class] students who struggled
with “[Topic]”. Make the questions simple, step-by-step, and
confidence-building. Include answers.
```

Solution Method

Use this for slow learners or students who need concept recovery.

Section 5:

FEEDBACK AND STUDENT SUPPORT PROMPTS

Give better student feedback, support slow learners, guide advanced students, and create personalized improvement plans.

Prompt 41: Personalized Student Feedback

Problem: Writing individual feedback takes time.

AI Prompt:

```
Write personalized feedback for a student who performed [Performance Level] in [Subject/Topic]. Mention strengths, areas for improvement, and encouraging next steps. Keep the tone professional and supportive.
```

Solution Method

Customize the feedback with the student's name and specific performance details.

Prompt 42: Positive Feedback Comments

Problem: Teachers need encouraging comments for students.

AI Prompt:

```
Create 20 positive feedback comments for students who are improving in [Subject]. Keep the tone motivating, teacher-friendly, and suitable for report cards or notebooks.
```

Solution Method

Use these comments for student appreciation and progress reports.

Prompt 43: Constructive Feedback

Problem: Weak performance must be addressed carefully.

AI Prompt:

```
Write constructive feedback for a student who is struggling in [Subject/Topic]. The feedback should be kind, clear, and action-oriented. Include 3 improvement steps.
```

Solution Method

Use this for parent meetings, report cards, or personal student guidance.

Prompt 44: Feedback for Homework

Problem: Teachers need quick comments for homework correction

AI Prompt:

```
Create 15 short homework feedback comments for [Grade/Class]
students. Include comments for excellent work, average work,
incomplete work, careless mistakes, and improved performance.
```

Solution Method

Use these comments while checking notebooks or assignments.

Prompt 45: Student Improvement Plan

Problem: Some students need structured academic support.

AI Prompt:

```
Create a student improvement plan for a [Grade/Class] student
struggling in [Subject]. Include problem areas, weekly goals,
teacher support, parent support, practice activities, and
progress tracking method.
```

Solution Method

Use this for academic intervention and parent communication.

Prompt 46: Support for Slow Learners

Problem: Slow learners need simplified teaching support.

AI Prompt:

```
Suggest teaching strategies to support slow learners in
[Grade/Class] for the topic "[Topic]". Include simplified
explanation methods, activities, assessment ideas, and motivation
tips.
```

Solution Method

Use these strategies to adjust teaching without making the student feel embarrassed.

Prompt 47: Support for Advanced Learners

Problem: Advanced students may get bored with regular tasks.

AI Prompt:

```
Suggest enrichment activities for advanced learners in
[Grade/Class] studying "[Topic]". Include challenge questions,
research tasks, creative projects, and leadership roles.
```

Solution Method

Use this to keep high-performing students engaged.

Prompt 48: Student Motivation Message

Problem: Students sometimes need emotional encouragement.

AI Prompt:

```
Write a short motivational message for [Grade/Class] students
who are feeling stressed about exams. Keep it warm, realistic,
and encouraging.
```

Solution Method

Share it before exams, in class groups, or during counselling moments.

Prompt 49: Study Plan for Students

Problem: Students struggle to organize study time.

AI Prompt:

```
Create a 7-day study plan for a [Grade/Class] student preparing
for a test on "[Topic/Subject]". Include daily study goals,
revision tasks, practice questions, and breaks.
```

Solution Method

Share this with students as a guided preparation plan.

Prompt 50: Parent-Friendly Student Progress Summary

Problem: Parents need clear updates without technical language.

AI Prompt:

```
Write a parent-friendly progress summary for a student in
[Grade/Class]. The student's strengths are [Strengths], areas
for improvement are [Weaknesses], and recent performance is
[Performance]. Keep the tone professional and helpful.
```

Solution Method

Use this for parent-teacher meetings or progress reports.

Section 6:

PARENT COMMUNICATION PROMPTS

Communicate clearly and professionally with parents through meeting messages, reminders, progress updates, and sensitive academic notes.

Prompt 51: Parent Meeting Message

Problem: Teachers need polite messages to invite parents.

AI Prompt:

```
Write a professional message inviting parents of [Grade/Class]
students for a meeting about [Reason]. Include date, time,
purpose, and polite closing.
```

Solution Method

Send this through school communication channels or WhatsApp groups.

Prompt 52: Homework Reminder to Parents

Problem: Students may forget homework or assignments.

AI Prompt:

```
Write a polite homework reminder message for parents of
[Grade/Class]. Mention the subject, task, submission date, and
request for support at home.
```

Solution Method

Use this for daily or weekly academic reminders.

Prompt 53: Exam Preparation Message

Problem: Parents need guidance before exams.

AI Prompt:

```
Write a message to parents of [Grade/Class] students about
upcoming exams. Include exam preparation tips, study routine
suggestions, sleep advice, and encouragement.
```

Solution Method

Send this before exams to improve home support.

Prompt 54: Low Performance Communication

Problem: Sensitive academic issues must be communicated carefully.

AI Prompt:

```
Write a professional and sensitive message to parents about a
student's low performance in [Subject]. Mention concern, need for
support, and request a meeting without sounding harsh.
```

Solution Method

Use this to maintain trust and avoid blaming the student or parent.

Prompt 55: Appreciation Message to Parents

Problem: Positive communication builds strong relationships.

AI Prompt:

```
Write a short appreciation message to parents for supporting
their child's learning in [Subject/Class Activity]. Keep it warm
and professional.
```

Solution Method

Use this after projects, events, improvement, or parent cooperation.

Prompt 56: Attendance Concern Message

Problem: Irregular attendance affects learning.

AI Prompt:

```
Write a polite message to parents about a student's irregular
attendance. Mention the importance of regular classes and request
their support.
```

Solution Method

Use this for early intervention before attendance becomes a serious issue.

Prompt 57: Behaviour Concern Message

Problem: Behaviour issues must be handled professionally.

AI Prompt:

```
Write a respectful message to parents about a student's classroom behaviour concern. Keep the tone calm, supportive, and solution-focused.
```

Solution Method

Use this after observing repeated behaviour patterns, not for one-time minor incidents.

Prompt 58: Event Announcement

Problem: Teachers need clear announcements for school events

AI Prompt:

```
Write a professional announcement message for parents about [School Event]. Include date, time, venue, dress code, things to bring, and important instructions.
```

Solution Method

Use this for field trips, competitions, annual day, exhibitions, or meetings.

Prompt 59: Project Submission Reminder

Problem: Students often delay project submissions.

AI Prompt:

```
Write a project submission reminder for parents and students of [Grade/Class]. Mention project topic, submission date, required format, and evaluation importance.
```

Solution Method

Send this a few days before the deadline.

Prompt 60: Parent-Teacher Meeting Summary

Problem: Teachers need documentation after meetings.

AI Prompt:

```
Create a parent-teacher meeting summary for a student in
[Grade/Class]. Include discussion points, academic concerns,
behaviour notes, agreed action steps, and follow-up date.
```

Solution Method

Use this for record keeping and future follow-up.

Section 7:

EXAM PREPARATION PROMPTS

Help students prepare smarter with revision notes, important questions, model papers, memory techniques, and last-minute study plans.

Prompt 61: Exam Revision Notes

Problem: Students need concise revision material.

AI Prompt:

```
Create exam revision notes for [Grade/Class] on "[Topic]".
Include key definitions, formulas, important points, examples,
and likely exam questions.
```

Solution Method

Share this as a revision handout or study material.

Prompt 62: Important Questions List

Problem: Students need focused exam preparation.

AI Prompt:

```
Create a list of important exam questions for [Grade/Class] on
"[Topic]". Divide them into short answer, long answer,
application-based, and higher-order thinking questions.
```

Solution Method

Use these questions for practice sessions and revision classes.

Prompt 63: Model Question Paper

Problem: Teachers need practice papers.

AI Prompt:

```
Create a model question paper for [Grade/Class] [Subject]. Total
marks: [Marks]. Duration: [Time]. Include sections, marks
distribution, instructions, and answer key.
```

Solution Method

Use this for mock exams or test preparation.

Prompt 64: Marking Scheme

Problem: Teachers need fair and consistent correction.

AI Prompt:

```
Create a marking scheme for the following question paper: [Paste Question Paper]. Include marks per point, expected answers, and partial marking guidance.
```

Solution Method

Use this to improve correction accuracy and transparency.

Prompt 65: Last-Minute Revision Plan

Problem: Students panic before exams.

AI Prompt:

```
Create a last-minute revision plan for [Grade/Class] students preparing for [Subject] exam in [Number] days. Include priority topics, revision schedule, practice tasks, and stress management tips.
```

Solution Method

Share this when students have limited time before exams.

Prompt 66: Formula Sheet

Problem: Students need all formulas in one place.

AI Prompt:

```
Create a formula sheet for [Grade/Class] students on "[Topic/Chapter]". Include formula, meaning of each symbol, example usage, and common mistakes.
```

Solution Method

Use this for mathematics, physics, chemistry, and accounting subjects.

Prompt 67: Memory Techniques

Problem: Students forget key points easily.

AI Prompt:

```
Create memory techniques, mnemonics, and simple tricks to
remember important points from "[Topic]" for [Grade/Class]
students.
```

Solution Method

Use this during revision sessions to make learning easier.

Prompt 68: Exam Writing Tips

Problem: Students know answers but write poorly in exams.

AI Prompt:

```
Create exam writing tips for [Grade/Class] students for
[Subject]. Include how to structure answers, manage time,
highlight key points, and avoid common mistakes.
```

Solution Method

Share this before exams to improve answer presentation.

Prompt 69: Practice Test With Answers

Problem: Students need exam-style practice.

AI Prompt:

```
Create a practice test for [Grade/Class] on "[Topic]" with
answers. Include objective, short answer, long answer, and
application-based questions.
```

Solution Method

Use this as a classroom test or home practice material.

Prompt 70: Weak Area Revision

Problem: Students need targeted revision for weak topics.

AI Prompt:

```
Create a revision plan for students who are weak in "[Topic]".
Include simple explanations, practice sequence, easy-to-hard
questions, and teacher support steps.
```

Solution Method

Use this for remedial classes and focused exam preparation.

Section 8:

CONTENT CREATION FOR TEACHERS

Create classroom notes, handouts, slides, posters, flashcards, reading passages, and learning resources with ease.

Prompt 71: Classroom Notes

Problem: Teachers need clear notes for students.

AI Prompt:

```
Create well-structured classroom notes for [Grade/Class] on
"[Topic]". Include headings, definitions, examples, key points,
diagrams description, and summary.
```

Solution Method

Use this as board notes, printed notes, or study material.

Prompt 72: PowerPoint Slide Content

Problem: Teachers need presentation-ready content.

AI Prompt:

```
Create PowerPoint slide content for [Grade/Class] on "[Topic]".
Include slide titles, bullet points, visual suggestions,
classroom questions, and summary slide.
```

Solution Method

Copy the content into PowerPoint, Canva, or Google Slides.

Prompt 73: Infographic Content

Problem: Visual learning improves understanding.

AI Prompt:

```
Create infographic content for "[Topic]" for [Grade/Class]
students. Include title, key sections, short points, icons
suggestions, and visual layout idea.
```

Solution Method

Use this to design posters, classroom charts, or digital learning material.

Prompt 74: Flashcards

Problem: Students need quick revision tools.

AI Prompt:

```
Create 30 flashcards on "[Topic]" for [Grade/Class]. Each
flashcard should have a question on one side and a short answer
on the other.
```

Solution Method

Use these for revision games, peer learning, or self-study.

Prompt 75: Summary Generator

Problem: Long chapters need shorter summaries.

AI Prompt:

```
Summarize the topic/chapter "[Topic]" for [Grade/Class]
students. Include main ideas, key terms, important facts, and
final recap in simple language.
```

Solution Method

Use this after completing a chapter or before revision.

Prompt 76: Vocabulary List

Problem: Students need to understand important terms.

AI Prompt:

```
Create a vocabulary list for [Grade/Class] students on "[Topic]".
Include term, simple meaning, example sentence, and student-
friendly explanation.
```

Solution Method

Use this for language development and concept clarity.

Prompt 77: Reading Passage

Problem: Teachers need subject-related reading practice..

AI Prompt:

```
Create a reading passage for [Grade/Class] students on "[Topic]".
Include 5 comprehension questions, vocabulary words, and answer
key.
```

Solution Method

Use this for English, science, social studies, or interdisciplinary learning.

Prompt 78: Case Study

Problem: Students need real-world application.

AI Prompt:

```
Create a case study related to "[Topic]" for [Grade/Class]
students. Include background, problem situation, discussion
questions, and suggested answers.
```

Solution Method

Use this for business studies, economics, science, social science, and life skills.

Prompt 79: Classroom Poster Text

Problem: Teachers need educational display material.

AI Prompt:

```
Create classroom poster content on "[Topic]". Include a strong
title, 5–7 key points, short explanation, and motivational line.
```

Solution Method

Use this for classroom walls, notice boards, or digital slides.

Prompt 80: Student Handout

Problem: Teachers need organized learning handouts.

AI Prompt:

```
Create a student handout for [Grade/Class] on "[Topic]". Include overview, key points, examples, activity, practice questions, and reflection section.
```

Solution Method

Use this as printed class material or PDF notes.

Section 9:

CLASSROOM MANAGEMENT PROMPTS

Build a positive classroom environment with prompts for rules, routines, behaviour management, group work, and conflict resolution.

Prompt 81: Classroom Rules

Problem: Teachers need clear classroom expectations.

AI Prompt:

```
Create a professional classroom rules list for [Grade/Class].
Keep it positive, simple, respectful, and easy for students to
follow.
```

Solution Method

Display the rules in class and discuss them with students at the beginning of the term.

Prompt 82: Behaviour Management Plan

Problem: Teachers need strategies for managing behaviour.

AI Prompt:

```
Create a classroom behaviour management plan for [Grade/Class].
Include positive reinforcement, correction steps, communication
method, and teacher response examples.
```

Solution Method

Use this to maintain discipline without creating fear.

Prompt 83: Handling Disruptive Students

Problem: Disruptions affect learning time.

AI Prompt:

```
Suggest professional strategies to handle disruptive behaviour in
a [Grade/Class] classroom. Include preventive steps, calm
responses, and follow-up actions.
```

Solution Method

Use these techniques consistently and document repeated issues.

Prompt 84: Classroom Routine

Problem: Students need predictable routines.

AI Prompt:

```
Create a daily classroom routine for [Grade/Class]. Include entry activity, lesson start, participation rules, transition method, closing activity, and dismissal routine.
```

Solution Method

Use this to reduce confusion and improve classroom discipline.

Prompt 85: Noise Control Strategies

Problem: Classroom noise can reduce focus.

AI Prompt:

```
Suggest 15 practical noise control strategies for [Grade/Class] students. Include verbal, non-verbal, activity-based, and positive reinforcement methods.
```

Solution Method

Choose 3–5 methods and apply them consistently.

Prompt 86: Managing Group Work

Problem: Group activities can become chaotic.

AI Prompt:

```
Create a classroom management plan for group work in [Grade/Class]. Include group formation, role assignment, noise control, time management, and assessment method.
```

Solution Method

Use this before starting group activities or projects.

Prompt 87: Positive Reinforcement Ideas

Problem: Students respond well to encouragement.

AI Prompt:

```
Create 20 positive reinforcement ideas for [Grade/Class]
students. Include verbal praise, reward systems, peer
appreciation, and non-material rewards.
```

Solution Method

Use these to motivate students and build a positive classroom culture.

Prompt 88: Conflict Resolution

Problem: Student conflicts need careful handling.

AI Prompt:

```
Create a conflict resolution process for handling disagreements
between students in [Grade/Class]. Include teacher steps,
student reflection questions, and follow-up actions.
```

Solution Method

Use this to solve conflicts calmly and fairly.

Prompt 89: First Day of Class Plan

Problem: The first day sets the tone for the year.

AI Prompt:

```
Create a first-day-of-class plan for [Grade/Class]. Include
welcome activity, teacher introduction, student icebreaker,
classroom rules, expectations, and closing reflection.
```

Solution Method

Use this to build trust and structure from day one.

Prompt 90: Classroom Reflection

Problem: Teachers need to improve after each class.

AI Prompt:

```
Create a teacher reflection checklist after teaching a lesson on
“[Topic]”. Include student engagement, understanding, timing,
classroom management, activity success, and improvement notes.
```

Solution Method

Use this after important lessons to improve future teaching.

Section 10:

TEACHER PRODUCTIVITY PROMPTS

Save time and stay organized with prompts for daily planning, reports, meetings, emails, workflows, and professional growth.

Prompt 91: Daily Teacher Planner

Problem: Teachers manage multiple tasks every day.

AI Prompt:

```
Create a daily planner for a teacher handling [Number] classes.
Include class schedule, lesson goals, materials needed,
correction work, meetings, reminders, and priority tasks.
```

Solution Method

Use this every morning to stay organized.

Prompt 92: Weekly Teacher Planner

Problem: Teachers need to balance teaching, correction, and admin work.

AI Prompt:

```
Create a weekly productivity planner for a teacher. Include
lesson planning, teaching hours, assessment work, parent
communication, student support, and personal preparation time.
```

Solution Method

Use this every week to avoid last-minute workload pressure.

Prompt 93: To-Do List Organizer

Problem: Teachers need educational display material.

AI Prompt:

```
Organize the following teacher tasks into urgent, important,
later, and delegate categories: [Paste Task List]. Suggest a
practical order to complete them.
```

Solution Method

Use this to prioritize work and reduce stress.

Prompt 94: Report Writing Assistant

Problem: Academic reports take time to write.

AI Prompt:

```
Write a professional academic report for [Grade/Class] on
[Subject/Event/Student Progress]. Include objective,
observations, achievements, challenges, and recommendations.
```

Solution Method

Edit the report with school-specific data before submission.

Prompt 95: Meeting Agenda

Problem: Teachers need structured meetings.

AI Prompt:

```
Create a meeting agenda for [Department/Parent/Staff] meeting
about [Topic]. Include objectives, discussion points, time
allocation, responsibilities, and action items.
```

Solution Method

Use this to conduct focused and productive meetings.

Prompt 96: Meeting Minutes

Problem: Teachers need clean documentation after meetings.

AI Prompt:

```
Create professional meeting minutes from the following notes:
[Paste Notes]. Include attendees, discussion points, decisions
made, action items, responsible persons, and deadlines.
```

Solution Method

Use this for department meetings, parent meetings, or academic planning.

Prompt 97: Email to Principal or Coordinator

Problem: Teachers need professional communication.

AI Prompt:

```
Write a professional email to [Principal/Coordinator] regarding [Purpose]. Keep the tone respectful, clear, and concise. Include subject line, greeting, message body, and closing.
```

Solution Method

Review the email for accuracy and send through official communication channels.

Prompt 98: Time-Saving Teaching Workflow

Problem: Teachers need to save time without reducing quality.

AI Prompt:

```
Create a weekly AI-assisted workflow for a teacher handling [Subject] for [Grade/Class]. Include how to use AI for lesson planning, worksheets, quizzes, feedback, parent communication, and revision.
```

Solution Method

Follow the workflow weekly to reduce repetitive workload.

Prompt 99: Teacher Self-Improvement Plan

Problem: Teachers need continuous professional growth.

AI Prompt:

```
Create a 30-day professional development plan for a teacher who wants to improve in [Skill Area]. Include weekly goals, practice tasks, reflection questions, and progress indicators.
```

Solution Method

Use this for personal growth, appraisal preparation, or skill improvement.

Prompt 100: End-of-Term Review

Problem: Teachers need to review academic progress at the end of a term.

AI Prompt:

```
Create an end-of-term review template for [Grade/Class]
[Subject]. Include syllabus completed, student performance,
assessment results, challenges, successful strategies, and next-
term recommendations.
```

Solution Method

Use this for academic records, department review, and future planning.

Bonus Section:

BEST PRACTICES FOR TEACHERS USING AI

1. Always Review AI Output

AI can make mistakes. Teachers should always check facts, examples, answers, and age suitability before using the content.

2. Personalize for Your Students

The best AI output comes when you add details about your students, classroom level, learning gaps, and available time.

3. Use AI as an Assistant, Not a Replacement

AI can help with planning, writing, simplifying, and organizing. The teacher's experience, emotional intelligence, and classroom understanding remain most important.

4. Protect Student Privacy

Avoid entering personal student data, private records, medical information, or sensitive family details into AI tools.

5. Improve Prompts With Context

A weak prompt gives a general answer. A strong prompt gives a practical answer.

Weak Prompt:
Make a lesson plan.

Strong Prompt:
Create a 40-minute lesson plan for Grade 7 students on water conservation. Include activity, worksheet, and homework.

Final Note

AI can help teachers save hours every week. It can support lesson planning, assessment, communication, classroom engagement, and student support.

When used wisely, AI becomes a powerful teaching assistant that allows educators to focus more on what matters most — helping students learn, grow, and succeed.

Master Prompt Template for Teachers

Use this master format whenever you need a custom AI prompt:

Master Prompt:
Act as an experienced teaching professional. I teach [Subject] to [Grade/Class] students. I need help with [Task]. The topic is [Topic]. The student level is [Beginner/Average/Advanced]. The class duration is [Duration]. Create a professional, practical, classroom-ready output with clear headings, step-by-step structure, examples, and teacher notes.
