THE PRACTICAL
AI WORKBOOK

AI *for* Teachers

Save time. Create better lessons.
Work smarter.

For teachers, lecturers, professors,
and all education professionals

Welcome

This book has one simpleidea: **you do not need to learn AI. You need to learn how to use AI to do your real work as a teacher.**

Every chapter follows a real teacher task: planning a lesson, making a worksheet, writing a test, giving feedback, or answering a parent email. Each chapter ends with a small practical task. After 12 chapters you will have a complete system for your own classroom.

Who is this book for?

- School teachers ofanysubject and grade
- College lecturers and university professors
- Trainers, tutors, and coaches
- Head teachers, coordinators, and school leaders

How to use this book

- **1.** Read onechapteratatime.Each one is short.
- **2.** Try the example prompts with your own topics. Replace anything in [brackets].
- **3.** Do the practical task at the end of each chapter.
- **4.** Use the Bonus prompt library and templates whenever you need them.

Teacher → AI → Teacher Review → Final Work

> **NOTE**
>
> AI makes mistakes. Always read and check what it gives you before you use it with students. Tool names and features change often, so this book teaches methods that work with any AI tool.

Contents

Chapter 1 AI asYour Daily Teaching Assistant 4

Chapter 2 Prompting AI to Do Teacher Work 7

Chapter 3 Use AI to Plan Your Lessons 10

Chapter 4 Use AI to Create All Your Teaching Materials 13

Chapter 5 Use AI to Create Tests, Quizzes and Assessments 15

Chapter 6 Use AI to Give Better Feedback and Personalize Learning 18

Chapter 7 Use AI for Classroom Activities and Engagement 21

Chapter 8 Use AI to Create Video, Audio and Digital Lessons 23

Chapter 9 Use AI to Save Time on Teacher Administration 25

Chapter 10 Use AI for Research, Content and Professional Growth 27

Chapter 11 Use AI Responsibly in Your Teaching Work 29

Chapter 12 Build Your Complete AI Teacher Workflow 31

Bonus 1 105 AI Prompts for Teachers 33

Bonus 2 15 Ready-to-Use Templates 38

CHAPTER 1

AI as Your Daily Teaching Assistant

Goal: *See what AI can really do in your daily work, and set up a simple workspace so you can start today.*

Teaching is more than the time you spend in the classroom. There is planning at night, marking on weekends, emails, reports, and meetings. Many teachers feel they never have enough hours.

AI cannot teach your students. But it can help with the **heavy lifting around your teaching**: the first drafts, the lists, the worksheets, the emails. Think of it as a very fast assistant who never gets tired, but who also needs clear instructions and careful checking.

1.1 What can AI do for a teacher?

Here are the main jobs AI can help you with. You will learn how to do each one in this book.

- Plan lessons
- Create teaching materials
- Make worksheets
- Build presentations
- Write quizzes and exams
- Write answer keys
- Give feedback on student work
- Make lessons easier or harder
- Write emails and reports
- Summarize long documents
- Research a topic
- Create images and diagrams
- Write video and audio scripts
- Plan classroom activities
- Organize your ideas
- Automate repeated tasks

1.2 The Teacher + AI workflow

The most important idea in this book is simple:

Teacher → AI → Teacher Review → Final Work

You start the work by telling AI what you need. AI writes a first draft. Then **you** check it, fix it, and make it right for your students. The final work is always yours.

What AI does well	What only you can do
Writes first drafts fast	Know your students
Gives many ideas quickly	Use your experience and judgment
Changes the format or level	Check that facts are correct
Does boring, repeated work	Be creative and caring
Never gets tired	Build trust and human connection

> **Remember:** AI prepares the first draft. The teacher makes it classroom-ready.

1.3 Choosing the right AI tool

Therearemany AItools,and new ones appear every month. You do not need all of them. Start with one chatbot, and add other tools only when you need them.

Type of tool	Good for	Examples of use
AI chatbot	Almost everything in writing	Lesson plans, quizzes, emails, ideas
AI search	Finding current information with sources	Researching a topic, finding news
AI writing tool	Improving and editing text	Fixing grammar, changing tone
AI presentation tool	Making slides	Turning an outline into a slide deck
AI image tool	Pictures and diagrams	Posters, illustrations, infographics
AI video tool	Short videos	Explainer videos with voice
AI audio tool	Voice and sound	Audio lessons, pronunciation practice
AI productivity tool	Notes and meetings	Summaries, action lists

> **NOTE**
>
> Tool names and features change quickly, so this book does not depend on any one product. Check what your school allows before you use a tool (see Chapter 11).

1.4 Set up your AI workspace

Spend30minutesnowtosavemanyhourslater. Do these five things:

- **1. Create an account** with one AI chatbot. A free plan is enough to begin.
- **2. Make a folder** on your computer called 'AI Teaching'. Save good prompts and results here.
- **3. Write your teaching profile.** Subject, grade, school board or curriculum, class size, student level, and your teaching style.
- **4. Start a prompt library.** A simple document where you paste every prompt that works well.
- **5. Save your common instructions.** For example: 'Use simple English. Add examples from daily life. Keep it short.'

Example: a teaching profile you can paste into AI

TRY THIS PROMPT

I am a [subject] teacher for Class [grade] in [country]. I follow the [curriculum or board]. My class has [number] students aged [age]. Most students are [average level]. I like [activity-based / discussion-based] teaching. Always use simple English and give examples from daily life.

PRACTICAL TASK

Practical task: Create your Personal AI Teacher Toolkit

- ☐ Choose one AI chatbot and create an account.
- ☐ Create the 'AI Teaching' folder.
- ☐ Write your teaching profile (use the example above).
- ☐ Open a document called 'My Prompt Library'.
- ☐ Try one small job today: ask AI to write a short, friendly note to parents.

CHAPTER 2

Prompting AI to Do Teacher Work

Goal: *Learn how to give AI clear instructions so it gives you useful work the first time.*

A **prompt** is the message you type to AI. The quality of your prompt decides the quality of the answer. A weak prompt gives a weak result. A clear prompt saves you time.

2.1 Turn a teacher task into a prompt

WEAK PROMPT

Make a lesson.

STRONG PROMPT

Create a 45-minute Class 8 science lesson on photosynthesis. Students are 13 years old and have never studied this topic. Include a starter question, a simple explanation, one group activity, and 5 questions to check understanding.

The second prompt works better because it tells AI who the students are, how long the lesson is, and what you want inside it.

2.2 The Teacher Prompt Formula

ROLE + TASK + CONTEXT + STUDENTS + REQUIREMENTS + FORMAT

Part	What to write	Example
Role	Who AI should act as	You are an experienced Class 8 science teacher.
Task	What you want	Create a lesson plan on photosynthesis.
Context	Time, place, curriculum	45 minutes, NCERT syllabus, no lab.
Students	Age, level, needs	13 years old, average level, some weak readers.
Requirements	What must be included	One activity, 5 questions, simple words.
Format	How to show the answer	A table with time, activity, and notes.

2.3 Give AI context

AIdoesnotknowyourclassroom. The more it knows, the better its answer. Tell it about:

- Subject
- Grade or class
- Student age
- Curriculum or syllabus
- Learning objectives
- Teaching place (online, small room, no projector)
- Lesson time
- Student ability
- Your teaching style

2.4 Control the output

YoucanaskAItoshowitsanswer in the shape you need. Just say it clearly:

- As a table
- As bullet points
- As step-by-step instructions
- As a worksheet
- As a teacher script
- As a lesson plan
- As a rubric
- As a checklist
- As a slide-by-slide outline

TRY THIS PROMPT

Explain how a bill becomes a law. Write it as 6 simple steps for Class 9 students. After each step, add one question to check understanding. Use a table.

2.5 Fix a bad AI answer

Your firstresultisrarelyperfect. That is normal. Do not start again. Just **talk to AI** and ask for changes. These short follow-up prompts are very useful:

- Simplify this.
- Make it suitable for Class 6.
- Add two more examples.
- Make it more interactive.
- Lower the reading level.
- Add a classroom activity.
- Make the questions harder.
- Remove repeated points.
- Make it shorter.
- Check this for factual mistakes.

Tip: Treat AI like a new assistant. Give feedback: 'Good, but too long. Make it half the length and add a real-life example.'

2.6 Build reusable prompts

When aprompt works well,saveit. Replace the parts that change with [BRACKETS]. Next time, only fill in the brackets. Here is a reusable lesson prompt:

TRY THIS PROMPT

You are an experienced [grade] [subject] teacher. Create a [minutes]-minute lesson on [topic] for students aged [age]. Their level is [level]. Include: learning objectives, a starter, main explanation with examples, one [type of] activity, 5 check questions, and homework. Use simple English. Show it as a table.

PRACTICAL TASK

Practical task: Write 10 prompts for your own teaching work

- ☐ Pick 10 jobs you do every month (a lesson, a quiz, a parent email, and so on).
- ☐ Write one prompt for each job using the formula.
- ☐ Test each prompt. Improve it until the answer is useful.
- ☐ Save all 10 in your Prompt Library.

CHAPTER 2

Use AI to Plan Your Lessons

***Goal:** Turn AI into a lesson-planning assistant for daily, weekly, monthly, and unit plans.*

Lesson planning takes many teachers hours every week. AI can create a strong first plan in minutes. Your job is to check it and fit it to your class.

3.1 From curriculum to lesson plan

Curriculum → Topic → Objectives → Lesson Plan

Start with your syllabus. Copy the topic and the learning goals into AI. Then ask for a plan.

TRY THIS PROMPT

Here is the topic from my syllabus: [paste topic and objectives]. Write 3 clear learning objectives that students can show by the end of the lesson. Start each with an action word like 'explain', 'compare', or 'solve'.

3.2 Create daily lesson plans

A full daily plan from AI can include:

- Learning objectives
- Introduction or starter
- Main explanation
- Student activities
- Questions to ask
- Examples
- Assessment (how to check learning)
- Homework

TRY THIS PROMPT

Create a 40-minute lesson plan on [topic] for Class [grade]. Show it as a table with columns: Time, What the teacher does, What students do, Materials. Include a 5-minute starter and a 5-minute exit question.

3.3 Weekly planning

GiveAIyournumberofperiods and your topics. It can spread the work across the week.

TRY THIS PROMPT

I teach [subject] to Class [grade]. I have [number] periods this week, each [minutes] minutes. Topics to cover: [list]. Make a weekly plan with objectives for each period, one revision session, and one short test on the last day.

3.4 Monthly and unit planning

AI can break a big syllabus into small pieces:

Month → Week → Lesson → Activity → Assessment

TRY THIS PROMPT

Here is my syllabus for the term: [paste]. There are [number] teaching weeks and [number] periods per week. Make a month-by-month plan. For each week, list topics, main activities, and when to test.

3.5 Try different teaching methods

Alreadyhavealesson?AskAItorebuilditinanew style. This is a fast way to make teaching fresh.

Method	What to ask AI
Activity-based	Add hands-on activities students can do in pairs.
Project-based	Turn this topic into a 1-week student project.
Inquiry-based	Write questions students must explore to find the answer.
Problem-based	Create a real problem that needs this topic to solve.
Discussion-based	Write 6 discussion questions and a debate setup.
Storytelling	Teach this topic through a short story.

3.6 Prepare before class

UseAIasyourprivatecoachbeforeyou walk in. Ask it for:

- Teacher notes
- Key ideas to stress
- Extra examples
- Questions students may ask
- Common mistakes and misconceptions
- The hardest part of the topic
- Real-world examples

TRY THIS PROMPT

I will teach [topic] to Class [grade] tomorrow. List the 5 most common misunderstandings students have about it. For each, give me a simple way to explain it correctly.

BE CAREFUL

Always check: AI may suggest timings that are not realistic, or content that does not match your syllabus. You know your class and curriculum best.

PRACTICAL TASK

Practical project: One complete lesson plan

- ☐ Pick one topic you will teach soon.
- ☐ Ask AI for objectives, then the full lesson plan.
- ☐ Ask for teacher notes and common misconceptions.
- ☐ Edit the plan so it fits your class, then use it.

CHAPTER 4

Use AI to Create All Your Teaching Materials

Goal: *Turn onelessontopicintomanyclassroomresources:worksheets,notes,flashcards, slides, and visuals.*

Once you have a lesson plan, AI can build everything around it. This is where you save the most time.

4.1 Worksheets

Ask AI for different kinds of worksheets:

- Practice sheets
- Homework
- Revision worksheets
- Reading comprehension
- Problem-solving sheets
- Vocabulary exercises

TRY THIS PROMPT

Create a one-page worksheet on [topic] for Class [grade]. Include 5 easy questions, 3 medium questions, and 2 challenge questions. Leave space for answers. Add a short title and a line for the student's name.

4.2 Notes and study guides

Turn a lesson into notes students can use at home:

- Chapter summaries
- Revision notes
- Study guides
- Key-point sheets
- Exam preparation material

TRY THIS PROMPT

Turn this lesson into a one-page study guide for students: [paste lesson]. Use simple English, short sentences, and bullet points. Add a 'Remember this' box with the 5 most important ideas.

4.3 Flashcards

AIisverygoodatflashcards for definitions, vocabulary, formulas, and question-and-answer practice.

TRY THIS PROMPT

Create 15 flashcards on [topic]. Show them as a table with two columns: Front (question or word) and Back (answer). Keep answers under 15 words.

4.4 Presentations

AIcanwrite thecontentfor your slides, even if you build them yourself. Ask for slide titles, slide text, examples, speaker notes, and discussion questions.

TRY THIS PROMPT

Create a 10-slide presentation outline on [topic] for Class [grade]. For each slide give: a title, 3 short bullet points, one picture idea, and speaker notes of 2 sentences.

4.5 Classroom posters and visuals

Withan AI image toolyoucan creatediagrams,infographics, posters, maps, timelines, and science pictures. Be clear about what you want to see.

TRY THIS PROMPT

Create a simple, colorful classroom poster that shows the water cycle. Show labels for evaporation, condensation, and precipitation. Clean white background. Easy for 10-year-old children to read.

NOTE

AI images sometimes contain spelling mistakes in labels or small errors in science and maps. Always check them before showing to students.

4.6 The complete resource package

Onetopiccanbecomeanentiresetofmaterialsinless than an hour:

Lesson Plan + Slides + Worksheet + Notes + Flashcards + Homework

PRACTICAL TASK

Practical project: A full resource package

- ☐ Choose one lesson.
- ☐ Ask AI for a worksheet, study notes, 15 flashcards, and a slide outline.
- ☐ Check every item for mistakes.
- ☐ Put them in one folder and name it clearly.

CHAPTER 5

Use AI to Create Tests, Quizzes and Assessments

Goal: *Prepare questions, tests, answer keys, and rubrics much faster.*

Writing good questions is slow work. AI can write many questions in seconds. You then choose the best ones, fix the weak ones, and make sure the answers are right.

5.1 Generate questions

- Multiple-choicequestions(MCQs)
- True or False
- Fill in the blanks
- Short answers
- Long answers
- Case studies
- Application questions
- Competency-based questions

TRY THIS PROMPT

Write 10 multiple-choice questions on [topic] for Class [grade]. Each question needs 4 options (A to D) and only one correct answer. Make the wrong options believable. Show the correct answer after each question.

5.2 Control the difficulty

Say exactly how hard you want the questions to be. You can ask for a mix.

Level	What students should do
Easy	Remember facts and simple ideas
Medium	Explain and use ideas in new examples
Difficult	Analyze, compare, and solve multi-step problems
Advanced	Judge, create, and apply to unfamiliar situations

5.3 Create tests

AI canprepare classtests, unit tests, weekly tests, revision tests, midterms, and mock exams. Give it the topics and the time.

5.4 Create full question papers

For a proper question paper, tell AI the rules. Include:

- Total marks
- Time allowed
- Number of questions
- Question types
- Difficulty mix
- Topics and learning goals

TRY THIS PROMPT

Create a 50-mark question paper for Class [grade] [subject], time 90 minutes, on these chapters: [list]. Section A: 10 MCQs (1 mark each). Section B: 5 short answers (3 marks each). Section C: 3 long answers (5 marks each). Mix of 40% easy, 40% medium, 20% hard.

5.5 Generate answer keys

Afterthepaper,askfortheanswersand a marking scheme. Say how marks should be given.

TRY THIS PROMPT

Write an answer key and marking scheme for the question paper above. For each long answer, show the points a student should include and how many marks each point earns.

BE CAREFUL

Check every answer. AI sometimes gives a wrong answer with great confidence, especially in maths and science. Solve a few questions yourself to be sure.

5.6 Create rubrics

Arubrictellsstudentshowtheir work will be judged. Ask AI for rubrics for essays, projects, presentations, assignments, and group work.

TRY THIS PROMPT

Create a rubric for a Class [grade] [essay/project/presentation] on [topic]. Use 4 levels (Excellent, Good, Fair, Needs Improvement) and 4 criteria. Write in simple words that students can understand. Show it as a table.

5.7 Create exit tickets

Anexitticketisaquicktaskatthe end of class. It shows you what students understood.

TRY THIS PROMPT

Write 3 exit-ticket questions on [topic] that take 3 minutes. Question 1: recall. Question 2: understanding. Question 3: 'What is still confusing?'

PRACTICAL TASK

Practical project: Question paper + answer key + marking scheme

- ☐ Pick one unit you have taught.
- ☐ Create a short question paper with AI (20 to 50 marks).
- ☐ Ask for an answer key and marking scheme.
- ☐ Check all answers and change anything that is not right.

CHAPTER 6

Use AI to Give Better Feedback and Personalize Learning

Goal: *Give more individual support to students without making everything from scratch.*

Every student learns differently. In a class of 40, it is hard to give each child what they need. AI can help you prepare feedback and different versions of materials, so more students get support that fits them.

6.1 Student feedback

AI can help you draft:

- Feedback on assignments
- Feedback on writing
- Progress comments
- Suggestions to improve
- Words of encouragement

6.2 Personalized feedback

To get useful feedback, give AI three things:

Student work + Rubric + Learning objective

TRY THIS PROMPT

Here is the rubric: [paste]. Here is a student's paragraph: [paste, with no name]. Write feedback for a Class [grade] student in a kind, clear tone. Include: one strength, one mistake, one area to improve, and one next step. Keep it under 80 words.

BE CAREFUL

Teacher review is a must. AI feedback that affects marks or reports must always be read and approved by you. Remove student names before you paste any work (see Chapter 11).

6.3 Teach the same lesson at three levels

Beginner → Standard → Advanced

TRY THIS PROMPT

Here is my lesson on [topic]: [paste]. Rewrite it in three versions: Beginner (very simple words, more examples, smaller steps), Standard (as it is), and Advanced (deeper thinking and harder questions).

6.4 Support students who struggle

- Simplerexplanations
- More examples
- Step-by-step practice
- Extra exercises
- Revision material

TRY THIS PROMPT

Explain [concept] to a Class [grade] student who finds it hard. Use very short sentences and one daily-life example. Then give 5 practice questions that start very easy and slowly get harder.

6.5 Challenge advanced students

- Harder questions
- Small research tasks
- Extension activities
- Higher-order thinking problems

TRY THIS PROMPT

Create 5 challenge tasks on [topic] for fast learners in Class [grade]. They should need thinking, not just memory. Include one 'What if...' question and one real-world problem.

6.6 Accessibility

AIcanhelpmakelearning open to more students. Use it to:

- Simplify difficult text
- Change the reading level
- Translate materials
- Explain in a different way
- Turn long text into clear steps

NOTE

Always ask a fluent speaker to check translations, especially for the language students speak at home.

PRACTICAL TASK

Practical project: Three learning levels

- ☐ Take one lesson you already have.
- ☐ Ask AI to make Beginner, Standard, and Advanced versions.
- ☐ Review each version and fix anything too easy, too hard, or wrong.
- ☐ Use them in your next class.

CHAPTER 7

Use AI for Classroom Activities and Engagement

Goal:*Makeyourclassesmore fun, active, and interesting.*

Students remember what they do far better than what they only hear. AI is a great idea machine for activities. Ask for ten ideas, pick the best two, and improve them.

7.1 Generate activities

- Icebreakers
- Group activities
- Pair activities
- Brainstorming
- Discussions
- Debates
- Role plays
- Games
- Puzzles

TRY THIS PROMPT

Give me 5 pair activities for teaching [topic] to Class [grade]. Each one should take 10 minutes, need no special materials, and include clear instructions for students.

7.2 Subject-specific ideas

Subject	Ask AI for
Maths	Real-world problems, number games, shop and money challenges
Science	Simple experiments, investigations, 'predict and test' tasks
English	Writing challenges, vocabulary games, speaking practice
History	Role play of historic events, simulations, debates
Geography	Map games, travel plans, 'which place am I?' clues
Languages	Dialogues, picture stories, pronunciation games

7.3 Turn boring topics into interactive lessons

Boring topic	Interactive version
A history chapter	A detective mystery: students find clues to solve what happened
A science topic	A classroom investigation with a question to answer
A maths topic	A real-world challenge, such as planning a school trip budget
A grammar rule	A 'fix the broken sentences' team race

TRY THIS PROMPT

Turn this topic into a detective mystery for Class [grade]: [topic]. Write a short story, 5 clues students must find, and the answer. The activity should take 30 minutes in groups of 4.

7.4 Questions during class

Goodquestions drive thinking.AskAIfor discussion questions, critical-thinking questions, follow-up questions, and debate topics.

TRY THIS PROMPT

Write 8 questions on [topic] for Class [grade]: 3 'what happened' questions, 3 'why' questions, and 2 'what do you think' questions with no single right answer.

7.5 Classroom games

- Quizgames
- Jeopardy-style games
- Mystery games
- Escape-room activities
- Team competitions

TRY THIS PROMPT

Create a Jeopardy-style game on [topic] with 4 categories and 5 questions each, worth 100 to 500 points. Include the answers and rules for 4 teams.

PRACTICAL TASK

Practical project: A 45-minute interactive class

- ☐ Choose one topic your students find dull.
- ☐ Ask AI to turn it into an activity-based lesson with a game.
- ☐ Make sure the plan has a start, an activity, and a closing check.
- ☐ Teach it and note what worked.

CHAPTER 8

Use AI to Create Video, Audio and Digital Lessons

Goal:*Makedigitalteaching content without advanced technicalskills.*

You do not need to be a video editor to make a digital lesson. AI can write the script, create pictures, add a voice, and add subtitles. You guide the process.

8.1 Educational video scripts

- Explainerscripts
- Short lessons
- Revision videos
- Demonstrations

TRY THIS PROMPT

Write a 3-minute video script that explains [topic] to Class [grade]. Use simple words and short sentences. Start with a question that makes students curious. Show the script in two columns: What we see | What the narrator says.

8.2 How video production works

Topic → Script → Visuals → Voice → Video → Subtitles

- **1. Write the script** with AI and read it aloud to check it sounds natural.
- **2. Create visuals:** slides, images, or short clips.
- **3. Add a voice:** record your own voice, or use an AI voice tool.
- **4. Put it together** with a simple video tool.
- **5. Add subtitles** so every student can follow.

8.3 AI voice and audio

- Narrationfor slides
- Audio lessons students can listen to
- Pronunciation exercises
- Audio summaries of chapters

8.4 Convert material you already have

Youdonotneedtostartfromnothing.Changewhatyou have into a new form:

From	To
Text	Script
PDF or notes	Summary
Lesson plan	Video script
Lecture	Study notes

8.5 Online teaching

AIcanhelp youprepare online lessons, digital worksheets, recorded lessons, online quizzes, and discussion prompts for forums.

8.6 Educational images

- Diagrams
- Illustrations
- Maps
- Historical scenes
- Scientific visuals
- Infographics

BE CAREFUL

Check pictures carefully. AI images can show wrong details, such as a map with mistakes or a science picture with extra parts. Also check the tool's rules about using images in class.

PRACTICAL TASK

Practical project: A 3 to 5 minute digital lesson

- ☐ Pick a lesson you already teach.
- ☐ Ask AI for a short video script.
- ☐ Add pictures and a voice, then record or export the video.
- ☐ Share it with students and ask what they thought.

CHAPTER 9

Use AI to Save Time on Teacher Administration

Goal: *Reduce the paperwork, emails, and reports that take up your evenings.*

A big part of your week is not teaching. It is writing emails, preparing reports, and joining meetings. This is where AI can give you back the most hours.

9.1 Emails

- Emails to parents
- Emails to staff
- Emails to students
- Meeting invitations
- Reminders
- Announcements

TRY THIS PROMPT

Write a polite email to parents of Class [grade] about [reason]. Be warm and clear. Include the date [date] and what parents need to do. Keep it under 120 words.

9.2 Reports

AI can draft student reports, progress reports, class reports, activity reports, and academic summaries. You give the facts; AI shapes the writing.

TRY THIS PROMPT

Write a short report comment for a student. Strengths: [list]. Needs to improve: [list]. Next step: [list]. Tone: kind and honest. Length: 50 words. Do not use the student's name; write 'the student'.

9.3 Meetings

- Create anagenda
- Prepare discussion points
- Summarize your meeting notes
- List action items
- Organize follow-ups

TRY THIS PROMPT

Here are my meeting notes: [paste]. Summarize in 5 bullet points. Then list action items in a table with columns: Task, Who, Deadline.

9.4 Documents

- Notices
- Circulars
- Academic plans
- Event plans
- Checklists
- Instructions for students

9.5 Summarizing

Start with	Get
A long document	A short summary
A meeting	Action items
A research paper	Key findings
Notes about a student	A draft report

9.6 Turn repeated tasks into AI workflows

Look atyour month. Whichtasks doyou doagainandagain?Write one good prompt for each, save it, and reuse it. This is the secret to saving hours.

Tip: If you do something three times, make a prompt for it.

BE CAREFUL

Do not paste student names, marks linked to names, health details, or private school documents into public AI tools. Remove personal details first (see Chapter 11).

PRACTICAL TASK

Practical project: 10 repeated tasks

- ☐ List 10 tasks you do every month.
- ☐ Write an AI prompt for each.
- ☐ Test them and improve them.
- ☐ Save them in your Prompt Library under 'Administration'.

CHAPTER 10

Use AI for Research, Content and Professional Growth

Goal: *Use AI to learn faster, write better, and grow in your career.*

This chapter is for you, the learner. Teachers, lecturers, and professors can all use AI to understand new ideas, plan research, and keep growing.

10.1 Research help

- Research ideas
- Research questions
- Brainstorming
- Understanding hard concepts
- Structure for a literature review
- Organizing your notes
- Interview questions

TRY THIS PROMPT

I want to study [topic] in the context of [school / college]. Suggest 8 research questions. For each, explain in one line why it matters and what data I would need.

10.2 Help with research papers

- Summarizeapaper
- Explain complex ideas in simple words
- Compare two theories
- Find common themes
- Organize research notes

BE CAREFUL

Danger: AI can invent fake references and wrong research claims, and it will sound very sure. Always check any important fact, study, name, or number in the original source.

10.3 Professional development

- Learnnewteachingmethods
- Explore education theories
- Practice new skills
- Prepare for workshops
- Make a professional development plan

TRY THIS PROMPT

I am a [subject] teacher with [number] years of experience. I want to improve at [skill]. Make a 4-week learning plan with 30 minutes of work per day. Include reading, practice tasks, and a way to check my progress.

10.4 Create educational content

Manyteacherssharewhattheyknow.AIcanhelp you write:

- Articles
- Blog posts
- Newsletters
- Posts for social media
- Course materials

10.5 Build your knowledge assistant

Read → Summarize → Question → Explain → Apply

Step	Ask AI
Read	Here is an article. Read it.
Summarize	Give me the 5 main ideas in simple words.
Question	Ask me 5 questions to test my understanding.
Explain	Explain the parts I got wrong.
Apply	How can I use this in my class next week?

PRACTICAL TASK

Practical project: Your personal learning plan

- ☐ Choose one topic you want to learn this term.
- ☐ Ask AI to build a 4-week plan.
- ☐ Use the Read-Summarize-Question-Explain-Apply method each week.
- ☐ Check any facts in the original sources.

CHAPTER 11

Use AI Responsibly in Your Teaching Work

Goal: *Use AI safely: check its work, protect students, and keep learning honest.*

AI is powerful, but it can be wrong, unfair, or unsafe if used carelessly. This chapter is short and practical. Follow these habits and you will be fine.

11.1 Check AI's work

Check → Verify → Edit → Approve

Before you use anything AI gives you, look for:

- Wrong facts
- Bias or unfair ideas
- Fake references
- Out-of-date information
- Unsuitable examples
- Poor or confusing explanations

11.2 Protect student information

Treat AI tools like a public place. Do not casually type private information into them. Be careful with:

- Student names
- Personal details
- Health information
- Money information
- Passwords
- Confidential records
- Private school documents

Easy habit: Replace names with 'Student A' and 'Student B'. Remove addresses and phone numbers. Use tools approved by your school, and follow your school's rules.

11.3 AI and student work

StudentsnowuseAItoo.Teachersneed clear rules about homework, copying, and honesty. Think about:

- When students may use AI, and when not
- What counts as plagiarism
- Telling the teacher when AI was used
- Why AI-detection tools are not reliable and should not be your only proof

A better approach: design work where students must show their thinking. For example:

- Explain their answer in their own words
- Show the steps they took
- Discuss their work with you
- Use examples from your own class
- Do part of the task in class

11.4 Copyright

Checktherights for AI-made images, text, videos, and outside materials. If you are not sure you may use something, do not use it, or ask your school.

11.5 Your Personal AI Safety Checklist

- ☐ Is the information correct?
- ☐ Did I check the important facts?
- ☐ Did I protect student privacy?
- ☐ Is the content suitable for this age group?
- ☐ Do I have permission to use this material?
- ☐ Did I read and review the AI output myself?

PRACTICAL TASK

Practical task: Make your own rules

- ☐ Copy the checklist above and keep it near your computer.
- ☐ Read your school's rules about AI.
- ☐ Write 3 simple AI rules for your students and share them in class.

CHAPTER 12

Build Your Complete AI Teacher Workflow

Goal:*Bringeverything togetherinto one simple systemyou can use everyweek.*

You now know the parts. In this chapter you will join them into a routine that saves you time every week.

12.1 Build your personal AI teaching assistant

Write one 'master prompt' that tells AI about you and your classes. Paste it at the start of any new chat. Or, if your tool allows, save it as custom instructions.

TRY THIS PROMPT

You are my teaching assistant. I teach [subject] to Class [grade] at [school type] in [country]. Curriculum: [name]. Class size: [number]. Student level: [level]. My teaching style: [style]. Always: use simple English, give real-life examples, keep answers short unless I ask for more, show plans in tables, and tell me if you are not sure about a fact.

12.2 The One-Topic to Complete-Lesson system

Give AI a single topic, for example **Photosynthesis**. Then ask for these 12 items, one by one:

#	Item	#	Item
1	Learning objectives	7	Quiz
2	Lesson plan	8	Homework
3	Teacher notes	9	Answer key
4	Presentation	10	Revision notes Personalized
5	Classroom activity	11	versions Digital lesson or
6	Worksheet	12	video script

Then you do the human part:

Review → Correct → Personalize → Teach

12.3 Your weekly AI workflow

When	AI helps you with
Before the week	Weekly plan, lesson plans, slides, worksheets, activities, tests
During the week	Quick explanations, extra questions, activities, feedback, class resources
After the week	Looking at results, feedback, reports, revision plans, next week's preparation

12.4 The 30-minute lesson preparation

Minutes	What to do
5	Learning objectives and lesson structure
5	Teaching content and examples
5	Activity and worksheet
5	Quiz and assessment
5	Slides and teacher notes
5	Your review and changes

> **Key message:** AI prepares the first draft. The teacher makes it classroom-ready.

12.5 The 7-Day AI Teacher Challenge

Day	Your mission
Day 1	Create your AI teacher toolkit (Chapter 1)
Day 2	Master prompting (Chapter 2)
Day 3	Create a complete lesson (Chapter 3)
Day 4	Create teaching materials (Chapter 4)
Day 5	Create assessments (Chapter 5)
Day 6	Create personalized learning resources (Chapter 6)
Day 7	Build your complete AI teaching workflow (this chapter)

"Don't learn AI for the sake of learning AI. Learn how to use AI to do your actual work as a teacher."

CHAPTER BONUS 1

105 AI Prompts for Teachers

Goal:*Copy,paste,andreplacethe[brackets].Saveyourfavoritesinyour Prompt Library.*

Lesson Planning (15)

1	Write 3 clear learning objectives for a lesson on [topic] for Class [grade]. Start each with an action word.
2	Create a 45-minute lesson plan on [topic] for Class [grade]. Use a table: Time, Teacher, Students, Materials.
3	Make a 5-minute starter activity that gets Class [grade] curious about [topic].
4	Write a simple step-by-step explanation of [topic] with 3 daily-life examples.
5	List 5 common mistakes students make in [topic] and how to correct each one.
6	Turn my syllabus [paste] into a weekly plan for [number] weeks.
7	Create a month plan for [subject], Class [grade], with topics, activities, and tests for each week.
8	Rewrite this lesson as a project-based lesson: [paste lesson].
9	Rewrite this lesson as an inquiry lesson with questions students must explore: [paste lesson].
10	Write teacher notes for [topic]: key ideas, tricky parts, and what to stress.
11	Give me 8 questions students might ask about [topic] and short answers I can give.
12	Plan a revision lesson on [topic] with 3 short activities and a quick quiz.
13	Create a substitute teacher plan for Class [grade] on [topic] that needs no special preparation.
14	Plan a 20-minute lesson on [topic] for a day with only half the class present.
15	Write a closing activity for a lesson on [topic] that checks who understood and who did not.

Teaching Materials (10)

16	Summarize [chapter or text] in 10 simple bullet points for Class [grade].
17	Explain [concept] using a story that a child aged [age] would enjoy.
18	Write 5 real-world examples of [concept] from daily life in [country]. Create
19	a short glossary of 15 key words for [topic] with simple meanings. Write a
20	one-page study guide for [topic] with a 'Remember this' box.

21	Create a comparison table of [thing A] and [thing B] for Class [grade].
22	Write a short reading passage on [topic] at a Class [grade] reading level, followed by 5 questions.
23	Make a timeline of the main events in [topic] with one line for each.
24	Explain [topic] in three ways: with words, with an analogy, and with a simple diagram idea.
25	Create a mnemonic or memory trick to help students remember [list or sequence].

Worksheets (10)

26	Create a one-page worksheet on [topic] with 5 easy, 3 medium, and 2 hard questions.
27	Make a fill-in-the-blanks worksheet with 10 sentences on [topic] and a word bank.
28	Write a matching worksheet: 10 terms on the left and 10 meanings on the right (mixed).
29	Create a vocabulary worksheet for [topic] with definitions, example sentences, and a short quiz.
30	Write 8 word problems on [topic] using real situations from [country].
31	Create a reading comprehension worksheet from this text: [paste]. Add 3 literal and 3 thinking questions.
32	Make a 'find the mistake' worksheet with 6 solved examples where each has one error.
33	Create a homework sheet on [topic] that should take 20 minutes.
34	Create a revision worksheet that mixes questions from these topics: [list].
35	Make a group worksheet where each student in a team of 4 has a different role.

Activities (10)

36	Give 5 icebreaker activities for a new class of age [age]. Each takes under 5 minutes.
37	Create a group activity on [topic] for 4 students per group. Include steps and materials.
38	Write a role play on [topic] with 4 characters, short roles, and discussion questions.
39	Design a debate on [statement] with rules, time limits, and a scoring sheet.
40	Create a classroom game on [topic] that needs only paper and a pen.
41	Suggest a simple experiment for [topic] using materials found at home or at school.
42	Create a scavenger hunt in the classroom for [topic] with 8 clues.
43	Design an escape-room style activity on [topic] with 5 puzzles.
44	Give 6 'think-pair-share' questions about [topic].
45	Create a 10-minute energizer game that also revises [topic].

Presentations (10)

46	Create a 10-slide outline on [topic] for Class [grade] with titles, 3 bullets, and a picture idea per slide.
47	Write speaker notes (2 sentences each) for these slides: [paste slide titles].
48	Make a 5-slide summary presentation of this chapter: [paste].
49	Write a strong opening slide and opening question for a lesson on [topic].
50	Suggest 5 pictures or diagrams that would help explain [topic] on slides.
51	Create a quiz slide set with 8 questions and answer slides for [topic].
52	Turn these notes into slide text with no more than 12 words per bullet: [paste].
53	Create a presentation for parents about [school event or program], 6 slides.
54	Write a presentation for a staff meeting on [topic], 8 slides with key messages.
55	Suggest a simple, clean design plan for my slides: colors, fonts, and layout rules for a classroom.

Assessments (10)

56	Write 10 MCQs on [topic] with 4 options and the correct answer marked.
57	Write 10 true/false questions on [topic] and ask students to correct the false ones.
58	Create a 30-mark test on [topic] with sections and a marking scheme.
59	Write 5 case-study questions on [topic] with a short real-life scenario for each.
60	Create a rubric for [type of work], 4 criteria, 4 levels, in student-friendly words.
61	Write an answer key with explanations for this test: [paste test].
62	Write 3 exit-ticket questions on [topic].
63	Create a mock exam for [subject], Class [grade], 90 minutes, 80 marks, covering [chapters].
64	Write application questions on [topic] that ask students to solve a new problem.
65	Make a peer-assessment checklist students can use to review each other's [work type].

Feedback and Grading (10)

66	Use this rubric [paste] to write feedback on this student work [paste, no names]. Give one strength, one fix, one next step.
67	Write 5 different encouraging comments for students who improved this week.
68	Turn my rough notes about a student into a polite, constructive report comment: [paste].
69	Write feedback on this paragraph that explains what to improve without rewriting it: [paste].
70	List the 5 most common errors in this set of answers and how to teach each: [paste anonymous answers].

71	Write feedback stems I can reuse, such as 'One thing you did well is...'. Give me 15.
72	Create a feedback sheet with space for strengths, improvements, and goals for next time.
73	Rewrite this comment to sound kinder but still honest: [paste comment].
74	Write a short personal note for a student who is discouraged. Keep it warm and under 60 words.
75	Suggest a simple way to track student progress on 5 skills across a term.

Personalized Learning (10)

76	Rewrite this explanation for a struggling Class [grade] student. Use short sentences: [paste].
77	Create Beginner, Standard, and Advanced versions of this lesson: [paste].
78	Write 10 extra practice questions on [topic] that go from very easy to medium.
79	Create 5 challenge questions on [topic] for advanced learners.
80	Make a step-by-step guide with examples that helps a student solve [type of problem].
81	Translate this worksheet into [language] and keep the instructions simple: [paste].
82	Reduce the reading level of this text to Class [grade-2] and keep the main ideas: [paste].
83	Create a visual-style explanation of [topic] using a table, steps, and a picture idea.
84	Write a 5-day catch-up plan for a student who missed lessons on [topic].
85	Design an enrichment project on [topic] that a fast learner can do alone in one week.

Administration (5)

86	Write an agenda for a 30-minute staff meeting about [topic].
87	Summarize these meeting notes into 5 bullets and a list of action items: [paste].
88	Write a school notice about [event] on [date]. Keep it clear and short.
89	Create a checklist for organizing [event or trip] with tasks and deadlines.
90	Draft a simple term calendar for [subject] from [start date] to [end date].

Parent Communication (5)

91	Write a friendly email inviting parents to a meeting about [topic] on [date].
92	Write a respectful email to a parent about their child's missing homework. Offer support.
93	Write a positive email to a parent about their child's progress in [subject].
94	Write a clear reminder to parents about [exam / event / fees] due on [date].
95	Write a calm reply to a parent who is upset about [issue]. Listen first, then explain, then offer a next step.

Research (5)

96	Give me 8 possible research questions about [topic] in education.
97	Explain this research paper in simple words and list its 5 key findings: [paste].
98	Compare [theory A] and [theory B] in a table: main idea, strengths, limits, classroom use.
99	Create a literature-review outline for the topic [topic] with sections and guiding questions.
100	Write 10 interview questions for a study on [topic] with teachers or students.

Creative Teaching (5)

101	Write a short poem or rap to help students remember [topic].
102	Create a story where the main character learns about [topic]. Keep it under 300 words.
103	Turn [topic] into a news report, an interview, or a letter written by someone in the story.
104	Suggest 5 fun ways to start a class on [topic], using a question, an object, or a short story.
105	Create a class challenge for the month on [theme] with points and small rewards.

CHAPTER BONUS 2

15 Ready-to-Use Templates

Goal:*Printthesepagesorcopythemintoyourowndocuments.Fillin the right-hand side.*

1. Lesson Plan Template

Subject / Class / Date	
Topic	
Time (minutes)	
Learning objectives (2 to 3)	
Materials needed	
Starter (5 min)	
Main teaching (with examples)	
Student activity	
Questions to ask	
Check for understanding	
Homework	
Notes after the lesson (what worked?)	

2. Weekly Planning Template

Week / Dates	
Monday: topic and objective	
Tuesday: topic and objective	
Wednesday: topic and objective	
Thursday: topic and objective	
Friday: topic and objective	
Revision / catch-up time	
Assessment this week	
Materials to prepare	
Notes for next week	

3. Worksheet Template

Title and topic	
Student name / Class / Date	
Instructions (short and clear)	
Part A: Easy questions	
Part B: Medium questions	
Part C: Challenge questions	
Space for working	
Self-check: 'I can ...'	

4. Quiz Template

Topic and class	
Number of questions / Time	
Question 1 to 5 (recall)	
Question 6 to 8 (understanding)	
Question 9 to 10 (thinking)	
Answer key	
Score table	
Follow-up: what to reteach	

5. Exam Template

School / Class / Subject	
Date / Time allowed / Total marks	
General instructions	
Section A: objective questions	
Section B: short answers	
Section C: long answers	
Marks for each section	
Answer key and marking scheme	

6. Answer Key Template

Exam / Quiz name	
Question number	
Correct answer	
Short explanation	
Marks given	
Common mistakes to watch for	
Alternative acceptable answers	

7. Assessment Rubric

Task / Class	
Criterion 1: Excellent / Good / Fair / Needs work	
Criterion 2: Excellent / Good / Fair / Needs work	
Criterion 3: Excellent / Good / Fair / Needs work	
Criterion 4: Excellent / Good / Fair / Needs work	
Total score	
Teacher comment	

8. Feedback Template

Student (use initials) / Task	
One strength	
One thing to fix	
Why it matters	
Next step	
Goal for next time	
Teacher signature / Date	

9. Parent Email Templates

Meeting invitation: 'Dear [Parent], I would like to invite you to ... on [date] at [time]. We will talk about ...'	
Progress update: 'I am happy to share that [child] has ... One area to grow is ... At home you can help by ...'	
Concern: 'I wanted to reach out about ... I would like to work together to ... Can we talk on [date]?'	
Reminder: 'This is a friendly reminder that ... is due on [date]. Please ...'	
Thank you: 'Thank you for your support with ... It made a real difference because ...'	

10. Presentation Template

Slide 1: Title and big question	
Slide 2: Learning goals	
Slide 3 to 6: Main ideas (one idea per slide)	
Slide 7: Example or case	
Slide 8: Activity	
Slide 9: Summary (3 points)	
Slide 10: Check questions	
Speaker notes for each slide	

11. Classroom Activity Template

Activity name	
Goal	
Time	
Group size	
Materials	
Steps (1, 2, 3...)	
Teacher role	
How I will check learning	
Changes for easier / harder	

12. Research Template

Topic	
Research question	
Why it matters	
Key sources found (check each yourself)	
Main findings	
Gaps / questions left	
How I can use this in class	
Next steps	

13. AI Safety Checklist

- ☐ Is the information accurate?
- ☐ Did I verify important claims?
- ☐ Did I protect student privacy?
- ☐ Is the content appropriate for this age group?
- ☐ Do I have permission to use this material?
- ☐ Did I review the AI output myself?

14. Personal AI Assistant Prompt

COPY AND PASTE THIS PROMPT

You are my teaching assistant. I teach [subject] to Class [grade] at [type of school] in [country]. Curriculum: [name]. Class size: [number]. Student level: [level]. Languages students speak: [languages]. My style: [style]. Rules: 1) Use simple English. 2) Give real-life examples. 3) Show plans and papers in tables. 4) Keep answers short unless I ask for more. 5) If you are not sure about a fact, say so. 6) Ask me one question if you need more information.

15. Complete AI Lesson Workflow

COPY AND PASTE THIS PROMPT

Topic: [topic]. Class: [grade]. Time: [minutes]. Please create, one at a time, and wait for me to say 'next': 1) Learning objectives 2) Lesson plan 3) Teacher notes 4) Slide outline 5) Classroom activity 6) Worksheet 7) Quiz 8) Homework 9) Answer key 10) Revision notes 11) Beginner and advanced versions 12) 3-minute video script.

“AI prepares the first draft. The teacher makes it classroom-ready.”
